

RibøMed

RiboMed

RNA in Disease

RiboMed is a Twinning project funded by the European Commission and was set on the strategic vision of Instituto de Medicina Molecular João Lobo Antunes (iMM, Portugal) iMM to focus on societal challenges related to Ageing and age-associated diseases by undertaking an RNA-targeted approach.

RiboMed networking strategy:

Promoting scientific excellence

Nurturing a community of self-challenging and ambitious students and early-stage researchers

Raising international awareness of iMM

Consolidating the innovation and entrepreneurship ecosystem
