

Biochemistry Global Summit Satellite meeting  
Centro de Congressos de Lisboa

Tuesday July 12 | 15:30–19:00

# RiboMed Satellite Conference on RNA in Disease

A new promising influential area in modern biology and medicine is ribonucleic acid (RNA) biology. It has revolutionised molecular biology and will have profound implications for future therapies. This session will illustrate it by hosting talks by distinguished researchers on RNA in biomedical contexts. The session will be extended with a poster session and two short talks selected from submitted abstracts.

## Chairs

**Maria Carmo-Fonseca**  
iMM, Portugal

**Nuno Barbosa-Morais**  
iMM, Portugal

**Cardiac splicing as a therapeutic target**  
**Michael Gotthardt**  
MDC Berlin, Germany

## Keynote

## Speakers

**TERRA transcription-mediated telomere maintenance in telomerase-negative cancer cells**  
**Bruno Silva**  
iMM, Portugal

**A brain-in-a-dish approach to model Angelman syndrome**  
**Simão Teixeira da Rocha**  
SCERG-iBB-IST, Portugal

**Macrophage function in the regenerating heart**  
**Filipa Simões**  
U. Oxford, UK

## Poster session

**Two short talks selected from submitted abstracts**

To sign up, go to

**Registration & Abstract submission (free!)**

Registration deadline: June 14
